Techmango

Java Technical Lead

Description

Java Development: Design, develop, and maintain Java-based applications. Write clean, efficient, and well-documented code.

Microservices Architecture: Develop and maintain microservices, ensuring scalability and performance. Work on the deployment and orchestration of microservices using containers.

API Integration: Design and implement robust RESTful APIs. Integrate third-party APIs and ensure seamless communication between various services.

Database Management: Develop, manage, and optimize database queries. Work with both SQL(Mandatory) and NoSQL(Optional) databases to ensure data integrity and performance.

Debugging : Identify bottlenecks and bugs, and devise solutions to these problems. Debug and resolve technical issues in a timely manner.

Collaboration: Work closely with product managers, designers, and other developers to understand project requirements and deliver high-quality solutions.

Continuous Improvement: Stay up-to-date with the latest industry trends and technologies. Advocate for best practices and continuous improvement in our development processes.
