## ReactJs Lead

### Description

Role: ReactJs Developer/Lead/Architect  
Exp: 2 to 15 Yrs  
Job Location: Chennai  
Mode: Work From Office  
Budget is Open  
Interview Levels: 2 Level of Internal Interview + 1 Level of End client Interview

### Position Details:

We are looking for a Web Engineer that has a solid understanding of JavaScript, NodeJS, React, and emerging JavaScript frameworks, to work on an agile cross-functional team that values collaboration, automation, and innovation. If you're a JavaScript enthusiast looking to build highly scalable, performant and fault-tolerant applications, come grow your skills as a software engineer at TechMango.

### Job Requirement:

You will be part of the International Eaply group, which focuses on and strives to provide best in class user experiences to our customers when they apply for our clients credit card products. Your work will be at the frontline of our client's commitment to excellence to their customers, and thus highly visible, impactful, and rewarding.

### What you will do:

Deliver features for end-to-end web application development on a multi-functional team  
Learn how to build applications using our in-house frameworks  
Collaborate with product owners to understand business needs and participate in refining stories  
Embrace code review, pair programming, and process innovation to better yourself and the team  
Optimize code for accessibility, performance, availability  
Increase the confidence in our deployments by writing tests, contributing to reliability frameworks, and finding automation opportunities  
Investigate and resolve production issues with the help of our site reliability team  
Innovate and implement new technologies in an effort to improve our team and applications

### Qualifications:

Have at least 3-5 years of experience in Web Development  
Have solid experience with front end frameworks and state management with or similar to React.js / Redux  
Have a strong understanding of NodeJS, Jest, Mocha, Rest, Graph SQL, Express  
Have experience with modern JavaScript coding, open source ecosystem, and development practices  
Have a passion for providing the best customer experience, and is comfortable optimizing for accessibility and performance  
Are comfortable working in an environment based on Agile development methodologies and DevOps principles  
Take initiative to mentor engineers, and collaborate with others in order to find solutions to the team's problem  
Are excited about innovation and automation
