## NodeJS Lead

### Description

**Role: NodeJs Developer/Lead/Architect**

**Exp: 2 to 15 Yrs**

**Job Location: Chennai**

**Mode: Work From Office**

**Budget is Open**

**Interview Levels: 2 Level of Internal Interview + 1 Level of End client Interview**

### Position Details:

We are growing our engineering team and are specifically looking for a teammate that can act as a peer to our existing senior engineers. You are someone experienced and extremely knowledgeable with system design as this is absolutely critical for success. You'll be working on the various API – powering our website, mobile application, and business facing products by working to migrate the backend services into a more robust microservice architecture. You have real experience working at a high-scale startup and have been heavily involved in system-level architectural discussions.

### What you will do:

- Defining a reproducible, scalable microservice development practice
- Implementing best practices for how to design system architecture to handle enterprise level traffic
- Improving the reliability & performance across all our services
- Improving our deployment to move more effectively
- Gaining better insight into errors and performance issues

### Qualifications:

- Have at least 3+ years of experience in Node.js, MongoDB, Postgres, Redis, Kafka, and Elasticsearch
- Have a strong understanding of NodeJS, Jest, Mocha, Rest, GraphQL, Express
- Have experience with modern JavaScript coding, open source ecosystem, and development practices
- Have a passion for providing the best customer experience, and is comfortable optimizing for accessibility and performance
- Are comfortable working in an environment based on Agile development methodologies and DevOps principles
- Take initiative to mentor engineers, and collaborate with others in order to find solutions to the team's problem
