## Senior NodeJs Engineer

### Skills

Node.js, Backend Development, SQL Queries, CI/CD  
Experience Required: 5+ Yrs

### Responsibilities

As a **Senior Software Engineer** in our Engineering Team, your role is crucial in shaping our innovative SaaS platform to ensure its reliability and scalability. Your contribution will be instrumental in our ongoing success. By focusing on performance and system reliability, nurturing team growth, prioritizing the product, and fostering knowledge sharing, you will drive innovation and ensure a high-quality customer experience.

### THIS IS YOU

- **Extensive experience** with PHP/NodeJS. You are comfortable with the ins and outs of PHP/ NodeJS from libraries and debugging tools to caches, thread-pools/event loops, and memory management.
- **A passion for shipping.** Bonus points for Trunk Based Development. CI/CD is your default. Putting code live every day is standard practice.
- **Database performance and optimization skills**, especially in MySQL. You can walk us through all the steps in a large query and tell us in which order they are executed and how to optimize the execution path. Explain is your friend.
- A **“Best tool for the job”** mentality. You are not a zealot and know that having a hammer does not make everything a nail. You are not afraid to try something new and know how to build consensus and knowledge in the team for new tech and concepts.
- **Excellent communication skills**(in English). You can naturally work with people from different backgrounds, both technical and non-technical. You are comfortable defending your ideas and challenging others. People enjoy working and debating with you.
- **Working with a remote team** is not new to you but just regular business.

### Job Benefits

Competitive Package, Free Accommodation, Medical Insurance, Accident Insurance, Subsidized Meal facility, Power Nap during noon, Work From Home option, Technology Grooming Community and more.
